1. MARCH IS ABOUT MAKING THE RIGHT CALL FIRST TIME

When you make the right call for your gas issues at home, you can reach the right service faster and get your problem solved. Find out who to call for boiler issues, appliance problems or meter issues.

- For gas meter issues call your gas supplier. Their number can be found at the top of your energy bill. If you have an annual care plan with your gas supplier they will fix any problems you might have with your gas appliances and pipework.
- For gas appliance and boiler issues and problems call the **Gas Safe Register** on **0800 408 5500** or visit their website to find a Gas Safe Registered engineer.
- **Smell gas?** Call the **Gas Emergency Number** on **0800 111 999**. If you smell gas, open doors and windows, turn off gas at the meter and don't use electric switches and extinguish naked flames.
Call the gas emergency number immediately.
- Power cut? Call 105.
